**UNITED STATES COLD STORAGE OPENS SACRAMENTO, CA, WAREHOUSE**

VOORHEES, NJ –United States Cold Storage (USCS) officially opened the doors on a second facility in Sacramento, CA. The move brings additional needed capacity to the northern California market.

USCS built the 6.8 million-cubic-foot warehouse on the north side of Sacramento in the McClellan Business Park (formerly McClellan Air Force Base). The multi-temp (-20F to +45F) site offers more than 31,000 pallet positions, 20 dock doors, and a rail siding served by both the Union Pacific and BNSF railroads.

USCS McClellan is conveniently positioned on the north end of Sacramento, directly off the Interstate 80 corridor and only a few miles from Interstate 5 interchange. The new facility also is in close proximity to nearby USCS warehouses in Tracy and Turlock, CA.

The Sacramento warehouse is fully racked with 65-foot refrigerated docks and multiple storage rooms—each with flexible storage temperature controls. In addition to traditional storage and distribution, the site will offer multi-vendor consolidation, crossdocking, a dedicated quality lab, and a temperature controlled special handling room. USCS also will utilize a state-of-the-art Cascade CO2 refrigeration system, 100% LED lighting, the latest in site security (including a high definition surveillance system), and cutting-edge fire suppression technology.

USCS also is proud to promote Steve Palefsky, a 16-year company veteran, to General Manager for USCS McClellan.

“Steve is a natural leader and his promotion to General Manager of our newest facility in California is well deserved,” says Rod Noll, Senior Vice President-Western Region.

Steve joined USCS in June 2000 as Bay Area Manager Trainee working between California sites in Union City and Oakland. In 2002, he transferred and helped with the Phase 2 and Phase 3 expansions at USCS Tracy. There, he later was promoted to posts as Warehouse Superintendent and Operations Manager.

“Having worked in the area, perhaps there’s nobody who better understands the role USCS McClellan will play with our Northern California customers,” adds Chris Harrington, Area Manager- Northern Central Valley.

“Our nearby sites will be used to help customers better manage freight during periods of seasonal high storage demands,” notes Palefsky. “These close locations also will provide better multi-vendor consolidation opportunities for our customers. This will result in efficient, cost effective shipping solutions.”

### **About United States Cold Storage**

United States Cold Storage, Inc. (USCS), Voorhees, N.J., is a premier provider of public refrigerated warehousing (PRW) and related logistics services throughout the USA. With roots dating back to 1899, USCS has long served a diverse customer base with requirements ranging from primary storage to fully integrated third-party logistics. The company offers more than 273 million cubic feet of temperature controlled warehouse and distribution space in 39 facilities located in 13 states including California, Delaware, Florida, Georgia, Illinois, Indiana, Nebraska, North Carolina, Pennsylvania, Tennessee, Texas, Utah and Virginia. USCS is the third largest PRW Logistics provider in North America. It is a subsidiary of the U.K.’s John Swire & Sons Ltd.
